Brewing Guide

Ember & Oak Coffee Roasters is a fictional shop used as ragkit demo data.

Pour-over

Use 22 grams of medium-fine coffee for 350 grams of water at 94C (200F). Bloom with 50 grams of water for 40 seconds, then pour slowly. Total brew time 3 minutes.

French press

Use 30 grams of coarse coffee for 500 grams of water just off the boil. Steep 4 minutes, stir, skim the crust, then press gently and serve right away.

Espresso

Dose 18 grams of fine coffee and pull about 36 grams of espresso in 25 to 30 seconds. Midnight Espresso is roasted for this; rest the beans 7 days after roasting first.

Cold brew

Mix 100 grams of coarse coffee with 1 litre of cold water and steep 16 hours in the fridge. Strain and dilute 1 to 1 with water or milk. Sunrise Blend is our favourite for cold brew.
